

IN THE SPECIFICATION

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

Beginning on page 8 and finishing on page 9, please change the second paragraph on page 8 to the following amended paragraph:

Referring now to FIGURE 1, the split marine ice making and delivery system 10 is adapted for marine applications wherein the refrigeration circuit 100 of the split ice making and delivery system 10 is split into two general sub-assemblies, the compressor and condenser (compressor/condenser) sub-assembly 20 and the remote ice making sub-assembly 50 adapted to be separated by many feet, compartments or floors of a marine vessel 1 via a refrigerant delivery sub-assembly 40. In an alternate embodiment, the split marine ice making and delivery system 10 is adapted for RV applications. The term "transport vehicle" as used herein means any means for conveying or moving persons or something over land, air, or water.

DRAWINGS

Please find enclosed four sheets of formal drawings, Figures 1-6, for the above application.
